## elmeg DECT Handset 400-40

### High-end DECT telephone for DECT400 system

The high-end DECT 400-40 handset has been perfectly matched to the elmeg DECT400 system. The ergonomic design and elegant appearance guarantee exceptional usability and easy access to features.

#### Product description

The mobile unit for elmeg DECT handset 400-20 reflects the latest state of the art: The ergonomic design and elegant exterior guarantee optimal ease of use, with a clearly laid out overview of functions. Making calls is a delight with the incoming caller ID function (CLIP), plain-language menu navigation and automatic accepting of calls.

The memory provides space for up to 65 of your own telephone directory entries and redialing of the last 10 numbers. A powerful battery packs a charge for up to 16 hours of talk time and 150 hours standby operation.

Thanks to its three-line graphic display, signaling LED and mute function, this mobile unit satisfy all the needs of even the most demanding user.

The elmeg DECT handset 400-40 is a high-end version that offers such additional functions as vibration alarm, headset jack and dust/splash protection in accordance with IP54.

The device is suitable for the elmeg DECT400 system – automatic handover when moving between radio cells is an integral component of this system and ensures permanent access and maximum telephoning mobility.

Numerous accessories, such as leather case, belt clip, etc. are also available.
